

To Whom It May Concern:

Jessica Mastro has worked part time with EPIC Players (a neuro-diverse theater troupe) since 2017. She was responsible for video-recording and photographing EPIC's production *Dog Sees God*. As a photographer and videographer, Jessica is reliable, professional, and able to work around the special needs of EPIC Players. Since many of our players are neuro-atypical (with developmental disabilities such as autism), they require a higher level of care. Not only does Jessica have strong communication skills, but she was also adept at the addressing the performer's sensory issues, including hyper-sensitive responses to: being mic-d, photographed, filmed, etc. Jessica is very resourceful, and she often comes up with unique solutions as complications arise. She also sang with EPIC on stage at Joe's Pub, helping our performers harmonize and stay on tempo. In conclusion, Jessica Mastro is a valuable asset of the EPIC Players team and would be a valuable asset to any employer.

Sincerely,

Aubrie Therrien
